Much work left by Congress for the next session
The main accomplishment by the 106th Congress in its first session was FY2000 appropriations. But there are many other pending pieces of legislation remaining for the second session, which started in late January. Congress has only about 100 working days scheduled, another complex appropriations debate brewing, and a backdrop of a presidential election year. Selected major pending legislative issues that ALA will follow this session include:

- **Database Protection Legislation.** Two dueling bills were introduced in the first session to provide new protection for databases in addition to protection already provided under copyright law. As previously reported, the Collections of Information Antipiracy Act (H.R. 354) is a seriously flawed bill sponsored by Rep. Howard Coble (R-North Carolina). This legislation, if passed, would provide copyright-like ownership of facts. Repeated attempts to present the bill for a vote by the full House were postponed thanks in part to academic librarians and their supporters. ALA supported an alternative bill, the Consumer Investor Access to Information Act (H.R. 1858), sponsored by Rep. Tom Bliley (R-Virginia). Both bills have been reported out of their respective committees; continued attempts to move to floor action are expected this session.

- **ESEA Reauthorization.** Reauthorizing the Elementary and Secondary Education Act (ESEA) is important to all types of libraries, especially school libraries. Several bills were reported out of the House Education and the Workforce Committee, including the Dollars to the Classroom Act (H.R. 2) and the Academic Improvement for All Students Act (H.R. 2300) were passed by the House as part of the reauthorization package, but no Senate action occurred before the end of session.

  The bills would provide up-to-date school library media resources and well-trained, professional certified school library media specialists for elementary schools and secondary schools. There has been no hearing on the House bill.

- **Filtering and Blocking Requirements.** Several attempts were made to require public libraries and K–12 schools to install filtering or blocking software on their computers. Sen. John McCain (R-Arizona) introduced the Children's Internet Protection Act (S. 97), which would mandate the use of technology to block or filter Internet access.

  The Senate Commerce Committee completed action on S. 97 (Rept. 106–141), and the GOP High Tech Task Force has listed this as one of their top priorities for passage early next session.

  Sen. Rick Santorum (R-Pennsylvania) introduced S. 1545, Neighborhood Children's Internet Protection Act. The bill would require schools and libraries receiving e-rate discounts to install blocking or filtering systems or implement Internet-use policies. The bill would also require a study of available Internet-blocking or filtering software. The bill is seen as a reasonable alternative to the more restrictive S. 97 by McCain.

- **NTIS Closing.** In August 1999 the U.S. Department of Commerce announced its intention to close the National Technical Information Service (NTIS) and transfer its functions to the Library of Congress (LC). Although hearings were held, the draft bill prepared by the Commerce Department has not been officially introduced. Alternatives about how to continue to manage the various NTIS functions include transferring the functions to the Government Printing Office or a "hybrid" solution with GPO, LC, and NARA accepting a mix of the functions.

  Additional information about these and many other issues is available at www.ala.org/washoff or by contact us at (800) 941-8478.
Our directories get used, abused and mangled. Why? Because everybody needs our reference products for everyday life. For example:

- **JOB SEEKERS**
- **SALES PEOPLE**
- **ENTREPRENEURS**
- **STUDENTS**
- **CONSUMERS**
- **PROFESSORS**
- **NEWS MEDIA**
- **LAW LIBRARIES**

infoUSA Inc.‘s products contain company name, address, phone number, SIC codes, estimated sales volume, number of employees, credit rating code*, key executive names, and more. Virtually all U.S. businesses - public and private.

**New for 1999!**
**Internet Access – ReferenceUSA** Enjoy real-time access to the world’s finest database of 10.5 million businesses with comprehensive coverage, accuracy and instant access to information. And that’s just the beginning! With its power, speed and user-friendly interface, ReferenceUSA becomes the most effective, easy-to-use reference tool available. Customized reports, immediate downloads and business profiles are a snap!

**American Business Disc** is the ultimate reference tool for Libraries. Imagine having over 10 million businesses on a single CD-ROM! Search by Company Name, Address, SIC Code(s), Yellow Page Heading, Sales Volume, Number of Employees, Geographically by ZIP Code(s), City(s), State(s), or even the entire U.S.

**American Manufacturers Directory & CD-ROM** contain every manufacturer in the U.S. with 20 or more employees, more than 168,000 total listings – all in two volumes. The CD-ROM contains all 545,000 manufacturers.

**Big Businesses Directory & CD-ROM** include America’s largest companies, 193,000 companies that employ 100 or more people. This directory also includes 703,000 top Executives and Directors.

**State Business Directories** are the most popular directories in every reference department. Before your patrons research any other source, point them to our publications. Four easy-to-use sections include: Businesses by City, Businesses by Yellow Page Category, Major Employers, and Manufacturers by City and Product.

**State Credit Directories & CD-ROM** are the most convenient Business Credit Reference Tools available! They make finding credit information fast, easy and affordable for all 50 states, plus Washington, D.C. And the business information included is invaluable for many applications.

---

* Our Credit Rating Codes are indicators of probable ability to pay. They are based on business demographic factors such as number of employees, years in business, industry stability, financial history, barriers to entry, and government data. We recommend that these ratings be used primarily as a referral point and should not be the sole factor used in making a credit decision. You must obtain more information from bank and trade references, local credit bureaus, or other sources before extending credit. We will not be liable for any losses resulting from the use of this information.
