Local Academies: An Opportunity for Professional Involvement

Academic librarians looking for professional growth opportunities should take note of the various state and local academies in the U.S. There are at least 44 such academies in the country at present, and they offer various avenues for involvement. Most academies are involved principally with the sciences, but many have humanities and social science interest groups, if not separate sections. At least two academies, those of Michigan and Ohio, already have library science sections.

Many state and local academies would probably welcome overtures to form separate sections for librarians; such sections provide a way for librarians to deliver papers and interact with colleagues without incurring long-distance travel expenses. The experience in Michigan during the last three years since we formed our section is that many librarians are emboldened to attend and deliver papers because of the friendly local atmosphere; our meetings have become a focal point for librarians' intellectual interaction.

It is also possible to interact with other sections of the academies, in various ways. Papers may be delivered to other sections, and published in the academy journal or newsletter. One could, for instance, do a joint presentation with a biology professor on a library instruction project, and disseminate the information to the rest of the academy afterwards through publication. One could also mount open forums on instruction, or on new developments in academic libraries as these affect research scholars. Opportunities for involvement in local academies are various, and available to any enterprising librarian willing to take an interest and make a commitment.

To find out more about local academies, order the Directory and Handbook of the National Association of Academies of Science (at $5 per copy) from the Archivist, Ohio Academy of Science, 445 King Street, Columbus, OH 43201, or contact Bill Miller, Chair of the BIS Cooperation Committee, c/o Reference Department, Michigan State University Libraries, East Lansing, MI 48824.—William Miller.
