Features Greater Cost-Effectiveness

HIGHER VALUE . . .

- 3,550,000 items cataloged by L. C. searchable on-line
- search by: LC card number, ISBN, ISSN, keywords in title, author, subject, classification number, series note, and many other data elements
  * Note: High search power combined with broad data coverage reduces "no-hits" to a minimum saving original cataloging costs of $10.00 or more per item.
- catalog records retrieved meet national standards
- cards produced automatically without mail delay
- holder codes displayed within consortium group
- BIBNET terminals access over 20 other on-line data bases
  * BIBNET services are available to all sectors throughout the nation: non-profit, profit, private, and public — everywhere people have a need for libraries.

LOWER COST . . .

- no special telephone lines to install
- dial-up instead of continuous communication charges
- no administrative overhead or R&D assessments
- LC retrospective cataloging added at your request without extra charge
- cards at 2½¢ each
- group discounts on use charges

At last, one source of subject access to 20

CUMULATIVE MONTHLY

This new fifteen volume single-alphabet index set is the largest and most comprehensive subject index to U.S. Government publications ever produced. It can be purchased either by itself, or as the key component of our U.S. MONTHLY CATALOG SUBJECT REFERENCE SYSTEM

This complete system contains the Index plus 106 full size reprint volumes of the Monthly Catalog, issued during the years 1895-1962—including the 30 volume “Classes Added” Edition (for 1895-1924) to which previously missing Superintendent of Documents Class Numbers were added under the supervision of Mary Elizabeth Poole. All reprint volumes are specially bound and marked for easiest use with the Cumulative Subject Index. Send for our free brochure on the Monthly Catalog Subject Reference System. It includes details of our unique offer of free “interim use” microfilm reels which can be used before (and after) complete sets of reprint volumes are delivered. Meanwhile, the Cumulative Subject Index may also be purchased in the Combined Reference Edition which, as explained on the coupon, includes the complete Monthly Catalog on Microfilm.

Note: On January 15, 1975, The Pre-Publication Price Goes Up From $965 To $1,160

We know this is a healthy 20% price increase. What we want you to know is that the content of the index volumes has increased an even healthier 30% since we first set the price (based on an estimate of 10,000 two-column pages in 14 volumes). But by the time we got to “Zythia” (the last entry) we had produced more than 13,000 pages, which will be bound in 15 volumes. Put another way, the set increased from some 1.4 million lines to more than 1.8 million lines, and that’s a lot of cumulative indexing at any price.
SUBJECT INDEX TO THE CATALOG OF UNITED STATES GOVERNMENT PUBLICATIONS 1900-1971

"In this ambitious new library tool, cumulative access is brought for the first time to the overwhelming majority of United States Government publications issued during the period 1900-1971. In this, it is an accomplishment unrivaled in size and scope. Documents librarians will find it a new and convenient time-saver and one which should offer them an additional means of providing an expanded Government publications service to their patrons."

from the Foreword by Carper W. Buckley
U.S. Superintendent of Documents, 1952-1970

The unique new CUMULATIVE SUBJECT INDEX will eliminate 34 search steps which were formerly necessary to trace subjects through these indexes to 20th Century U.S. Government publications:

—21 Biennial Document Catalogs (1900-1940),
—2 Decennial Indexes (1941-1960), and

All subject entries in the fifteen volume cumulative index were accumulated from 81 separate sources in the Monthly Catalog series and merged into one reference set. These sources include: 48 Annual Indexes to the Monthly Catalog, 2 Decennial Indexes, (1941-1950; 1951-1960), 1 Six-month Index, and 30 Monthly Catalogs for which no annual indexes were made.

When you need objective information on library equipment, furniture, and supplies, there is only one published authority—Library Technology Reports.

Library Technology Reports is a unique bimonthly consumer publication of the American Library Association. LTR is designed to provide critical, objective evaluations of products used in libraries, media centers, and other educational institutions.

Testing and evaluation are conducted by nationally recognized independent testing laboratories and consultants, among which are R. A. Morgan Company (microform readers); United States Testing Company (audiovisual equipment); William R. Hawken Associates (microform reader/printers); and Buyers Laboratory Inc. (photocopiers, typewriters, steel library shelving, and library furniture).

The Technology Application Center provides literature search services for academia, government, and industry. Presently drawing on about fifty automated data bases, TAC performs retrospective and current awareness literature searches in the sciences, social sciences, humanities, business, and the arts. TAC is a primary distributor for the Gemini, Apollo, and Skylab photographs for NASA, has catalogues available of the photographs, and is developing Educational Kits from the photographs.

---

Thank you for your interest. Please contact me if you have any questions or if you are interested in any of the services mentioned above. I would be happy to provide more information and answer any questions you may have.

Essential for every academic library.

**Subject Collections.** New 4th edition, available now.

Here's your guide to some 70,000 special collections in university, college, public and special libraries. The Bible. Banks and Banking. Polynesian art. English ballads. Whatever the interest, you'll be able to locate virtually every special library collection in the U.S., Canada, and Puerto Rico. And, for the first time, you'll find listings for many special museum holdings.

Entries, now arranged by Library of Congress headings, include name, location, curator, and number of holdings, plus all-important copying and inter-library loan details.

Keep pace with the academic community. Here, more than 37,000 men and women working in all areas of the humanities, are profiled. The people making news ... the individuals who have achieved status and responsibility ... the leaders in their fields.

For each alphabetically arranged entry, you'll find complete personal data plus information on fields of interest, degrees, major publications, and honors.
