Marquette University has received more than $143,000 from the National Endowment for the Humanities K–12 Education Program to conduct a summer 2000 institute, "America’s First Nations: American Indians in Social Studies Curricula." The institute, co-directed by Mark Thiel, assistant archivist, will include hands-on engagement ranging from ancient mammoth-hunting sites, readings guided by well-known researchers, and time to use archival and museum collections for classroom projects. More information on the project is available at http://www.marquette.edu/library/neh/.

Johns Hopkins University’s Milton S. Eisenhower Library has been awarded $500,000 in initial funding for one year from the Hodson Trust to establish a research institute to develop innovative technologies that enhance scholarship. Conceived as a university-wide resource, the institute will provide facilities, personnel, and expertise in the development of technologically enhanced instructional models. The institute will also conduct independently funded research and development on faculty training methods and materials using new technologies in teaching, particularly electronically enhanced teaching, for on-site and distance education courses. Since 1996, a portion of the Hodson Trust’s gift to Hopkins has supported the library’s expanding digital initiatives.

East Carolina University (ECU) has received $3,470 from the North Carolina Humanities Council to sponsor the symposium "Triumph of the Human Spirit: Friday Jones and His North Carolina Slave Narrative," held October 15–16, 1999. The symposium and an exhibition focused on the life of the Friday Jones (1810–87), a former slave from Wake County, North Carolina, who in 1883 published Days of Bondage: Life of Friday Jones, being a Brief Narrative of His Trials and Tribulations in Slavery. ECU’s Joyner Library holds the only original copy of the publication reflected in the OCLC database.

Furman University received $10 million from the Duke Endowment, a private foundation established in 1924 by industrialist and philanthropist James B. Duke. $9.5 million of the pledge will allow the university to begin a $25 million expansion and renovation of the James B. Duke Library. The facility must be refurbished to accommodate the increase in the student population, new information and research needs, and growth of a collection now totaling more than 400,000. The expansion will also include the Center for Collaborative Learning and Communication, a multimedia commons, collaborative study rooms, and a 24-hour study/computing area.

The New York Academy of Medicine Library was awarded a $435,000 grant by the Andrew Mellon Foundation to be used over a two-year period. The grant will fund four projects designed to upgrade the library’s online catalog and to make records of the library’s holdings more accessible to the public. As part of the project, the library has hired Alice Browne as rare book cataloger. A second project will be the conversion of 125,000 monographic catalog entries to electronic form by OCLC, Inc. Upon completion of this work, all books in the Academy Library will be represented by records in the online catalog.

The University of Virginia has been awarded a $200,000 Challenge Grant by the National Endowment for the Humanities (NEH) for its Electronic Text Center. With this grant, matched four-to-one by private fundraising over a four-year period, the library will create a $1 million endowment that will be used to expand online cultural and research sites. A portion of the NEH funds will go immediately to train and support graduate students, as well as to keep computer hardware and software up-to-date, and to provide quick-response digitizing support. Once the endowment is

fully funded, it will provide tens of thousands of dollars every year for the Etext Center's primary goals: to build and maintain an Internet-accessible collection of texts and images in the humanities, and to nurture a user community adept at the creation of these materials.

The New York Public Library's Research Libraries' Barbara Goldsmith Conservation Laboratory has received a $40,000 grant from the National Park Service's National Center for Preservation Technology and Training to create two multimedia resources for training in the conservation of endangered paper artifacts. Through distribution in various formats—a Web site, CD-ROM, and full-motion DVD—the training materials will depict selected basic and advanced techniques for the examination, analysis, and treatment of books, manuscripts, prints, drawings, photographs, and other paper-based items. The two productions funded through this grant will address basic analysis and documentation of paper and microanalytical testing of media.

Acquisitions

A collection of T. S. Eliot's books and pamphlets have been donated to the Beinecke Rare Book and Manuscript Library at Yale University by Donald C. Gallup, retired curator of the Yale Collection of American Literature. The 47 boxes and 2 file drawers contained major portions of Gallup's T. S. Eliot collection, the product of more than 60 years of bibliographic research. The gift includes an array of books, pamphlets, periodicals, and pamphlets containing texts by Eliot, in addition to more than 400 publications about the poet. Gallup had already donated his extensive collection of Eliot in translation, and in 1998 he presented to the library more than 100 books with titles taken from Eliot poems.

A collection of William Morris (1834–96)—the British designer, artist, poet, illustrator, printer, multifaceted craftsman, and utopian socialist—has been acquired by the Huntington Library, Art Collections, and Botanical Gardens. The collection, assembled by architects Sanford and Helen Berger, is rich in examples of embroidery, stained glass, textiles, drawings and ceramics and numbers more than 2,000 volumes. It also contains business records from Morris's business enterprises—Morris & Co. and the Kelmscott Press—and full-size designs used by the company in creating tapestries and stained-glass windows. There are also books authored by Morris, books from the library of Morris & Co., and special dedication and proof copies of Kelmscott Press books showing Morris' genius as a typographer, illustrator, and graphic designer.

Alexander von Humboldt's Essai Politique sur le Royaume de la Nouvelle-Espagne with the accompanying atlas titled Atlas Geographique et Physique du Royaume de la Nouvelle-Espagne were donated to the University of Texas at Arlington by the Summerlee Foundation of Dallas. The four volumes and atlas were published in Paris in 1825-27. Humbolt, a German scientist, spent five years in the Spanish dominions of the New World from 1799 to 1804 and recorded these experiences in a series of works stretching over decades after his return to Europe. One of the first of these was the Essai Politique. The atlas is important for its inclusion of Humboldt's great map "Carte Generale du Royaume de la Nouvelle Espagne," originally executed by Humboldt during his stay in Mexico (1803-04), and covering two large folio double sheets.
Programs at The Graduate Institute

Offering degrees in stimulating fields. Presented through three week summer residency and on-line classes.

Interested in Advanced Study at the Ph.D. or M.A. level?

Imagine the excitement of Oral Tradition and Storytelling!

The Graduate Institute offers the only Master of Arts in Oral Tradition. It also provides the gateway to the research-only Doctor of Philosophy from Lancaster University in England. Consider the opportunity for advancement through three weeks of on-site study and continuous on-line independent learning.

- Poignant learning, critical in the library sciences
- The convenience of self-directed inquiry
- High quality instruction and valuable degrees
- Engaging and productive cohort design
- Practical experiences for career development
- Exciting learning events

Doctor of Philosophy in RESEARCH

A research only (no taught classes!) experience guided by extraordinary supervisors and mentors. And it’s affordable!

Master of Arts in ORAL TRADITION

Explore the practices and performances in many cultures, mythologies and folktales. Featuring extraordinary storytellers, mentorship, children's literature, and studies of spiritual and religious oral traditions. Development of school curriculum to promote verbal skills through storytelling, and investigation of therapeutic applications.

Master of Arts in CONSCIOUS EVOLUTION

Focused on evolutionary societal changes and the dynamic forces of human spirit and awareness.

Master of Arts in HOLISTIC THINKING

Creative thinking processes and the integration of academic disciplines into systematic worldviews.

Master of Arts in EXPERIENTIAL HEALTH & HEALING

Effects and meaning of patient - healer interactions, and the integration of allopathic and complementary approaches to humanistic medicine.
