The new computer-produced Library of Congress National Union Catalogs on Advanced Library Systems microfiche offer expanded coverage, more flexibility, more convenience and more effective searching capability than has ever been possible before. Yet the low cost makes them accessible to libraries of all types and sizes.

State-Of-The-Art Efficiency For Your Library.

The new NUC Books is in index/register format. Now you can search the comprehensive collection of current catalog records produced by the Library of Congress and some 1500 North American libraries not only by name, but by title, subject and series as well. The indexes are cumulated each month. A single look-up will complete a search in most cases. The full bibliographic record can then be located in the register in seconds.

The new NUC microfiche can be used alone as a primary bibliographic source, or to complement your other bibliographic tools for cataloging, acquisitions, interlibrary loans, bibliographic verification, reference and research.

Current LC Subscriptions/Free Trial.

ALS can also provide current subscriptions to the LC NUC U.S. Books; Audiovisual Materials; Music, Books on Music and Sound Recordings; Cartographic Materials; Register of Additional Locations; LC Subject Headings; and Name Authorities. ALS offers a free 30-day trial to introduce you to the benefits of a current subscription.

Retrospective LC Catalogs.

ALS is the only source for the complete microfiche retrospective collection of the LC NUC from 1898; Subject Catalog from 1950; Audiovisual Materials from 1953; and Music, Books on Music and Sound Recordings from 1953. Our new, low prices make it possible for more librarians to acquire the complete collection or individual segments.

This year, take a giant step toward better bibliographic control. Keep your National Union Catalogs on ALS microfiche. They’re surprisingly affordable. They reduce shelf space over paper catalogs by 94%. And they offer more efficiency than ever before.

The Biggest Advance In Bibliographic Control Is Just One Small Step Away.
