**Deep Web**
A study by search company BrightPlanet indicates “hundreds of billions of highly valuable documents hidden in searchable databases that cannot be retrieved by conventional search engines.”

**Book buyers prefer paper**
The BookExpo America and Publishers Weekly survey of 1,140 Internet users, who bought at least one book either in a bookstore or online between July 1999 and July 2000, found only four who think e-books will replace printed books.

**Public library of the Internet**
The University of North Carolina at Chapel Hill’s Metalab was renamed ibiblio.org after receiving a $4-million gift from the Red Hat Center foundation to expand “the public library of the Internet.” The ibiblio server, a major repository of publicly available Linux software and digitized historical collections such as Documenting the American South, “handles an average of 1.5 million transactions daily.”

**E-book economic forecasts differ**
A PricewaterhouseCoopers study “forecasts that spending on e-publishing products in the trade area will jump from an estimated $53 million this year to $2.7 billion in 2004.” On the other hand, the banking firm Veronis Suhler’s Communication Industry Forecast reports “sales of e-products in the consumer segment are not expected to grow dramatically through 2004.”

**Hard drives in MP3 portables**
A 6-megabyte hard disk gives Creative Technology’s Nomad Jukebox the capacity to store 100 hours of music (approximately 150 CDs) in MP3 format.

**Grants to increase digital resources**
The Institute of Museum and Library Services awarded more than $2.7 million dollars for projects to digitize library resources at Cornell University, Georgia Department of Archives and History, Indiana University, Louisiana State University, Nebraska State Historical Society, New York Public Library, Northern Illinois University, Tufts University, University of Arizona, University of Georgia, University of North Carolina, and University of the Virgin Islands.
First, Voyager gave you integrated management capabilities for your library's print collections. Now Endeavor Information Systems introduces ENCompass - the next step in managing today's digital library. Smartly designed to work in tandem with Voyager, ENCompass integrates all of your resources, regardless of location or format. Digital or print - now your users can have it all.
No Boundaries.

Conquer the boundaries that stand between you and your information resources. Our state-of-the-art Web-based services allow you to access and manage your information collection from your desktop. We've linked these services electronically, providing you and your users seamless access to the full text you want, whether in an online database or electronic journal. And if an article isn't available electronically, you'll be notified if it's available in your print collection.

At EBSCO, we're not letting boundaries stand in our way — we're overcoming them.
