stated, “we have made considerable progress in techniques of evaluating equipment and supplies in order to determine appropriate levels of performance and durability.”

Carhart said that he was “proud of reaching the point where we support, with our own efforts, 57 per cent of our operating budget, and 29 per cent of research costs.” At the beginning, 100 per cent of Library Technology Program support came from the Council on Library Resources, Inc. Carhart added, “I must acknowledge, gratefully, the assistance given by the Advisory Committee of the Library Technology Program. Over the years, we have benefited from both the sound advice of committee members, and their considerable goodwill. Finally,” said Carhart, “I am proud of the Library Technology Program staff. From the beginning we have had a dedicated and intelligent staff always working in behalf of the Program. Together with the library profession itself, they have made success possible.”

CALLING ALL CONSTRUCTION!

If you are building a new library or making substantial physical changes in your library, the Library Administration Division will appreciate receiving pictures, slides, floor plans, sketches, explanatory materials, and a copy of your written building program. These materials are needed in the buildings collection used by librarians, architects, and other building planners. For details about this collection write: Mrs. Ruth R. Frame, Executive Secretary, LAD, ALA, 50 E. Huron Street, Chicago, Illinois 60611.

From Inside the DLP

By Dr. Katharine M. Stokes

As usual, this piece is being written two months before you will read it. We are surrounded by stacks and boxes of applications for Title II-A (Higher Education Act) grants for library materials. The Grants Section, headed by Mrs. Catherine Robertson, has “logged in” 2,282 applications for basic grants (of up to $5,000), 1,808 applications for supplementary grants (those that don’t require matching), 670 applications for Special Purpose Type A grants, 70 for Type B, and 61 for Type C (for cooperative acquisitions by groups of libraries).

The corresponding figures for 1968 were 2,153 basic applications, 2,111 of which received grants; 1,550 supplemental applications, 1,524 of which received grants; 493 Special Purpose Type A applications, 19 of which received grants; 52 Special Purpose Type B applications, 9 of which received grants; and Special Purpose Type C applications from 173 libraries. Eleven combinations comprised of 65 libraries were awarded Type C grants.

All of these past and present statistics are set down to help you understand why you did or didn’t receive a Title II-A award last month. The competition gets stiffer each year, but the $25,000,000 appropriation has remained the same for three years. Next year the President’s budget calls for half that amount.

The teams of evaluators have been with us for parts of two weeks rating the Special Purpose applications; the Grants Section is working through the basics; and Frank Stevens, Title II-A Specialist, Nathan Cohen, and I have almost finished checking the supplementary ones. We have had to make numerous phone calls, especially to universities which listed more than 30 PhD programs instead of grouping them under the fields of graduate study noted in Appendix 2 of the application form. Sometimes we could classify them ourselves, but when Xerox copies of pages from a graduate catalog are the only clue, not even distinguishing master’s programs from doctoral ones, we couldn’t cope!

We are impressed again with the great need for resources in libraries at all academic levels, from the innumerable new community colleges to the universities with their proliferating new graduate programs.

Congratulations to those of you whose needs were great enough, and well documented enough, to receive the highest ratings. My sympathy to all the rest of you who need the money we don’t have to distribute.
ANNOUNCED REPRINTS

A cumulative, quarterly (February, May, August, November) publication that lists forthcoming reprints—i.e. full-size, hard-bound reprints that have been announced but have not yet been produced. It includes books, journals, and other materials originating with publishers both in the United States and abroad. Softbound. Postage paid. $30.00 per year.

GUIDE TO REPRINTS. 1969

An annual, cumulative list, in alphabetic order, of books, journals, and other materials available in reprint (full-size, hard-bound) form from publishers in the United States and abroad. Over 25,000 titles issued by 183 reprint publishers. 223 pp. Softbound. Postage paid, $5.00.

GUIDE TO MICROFORMS IN PRINT. 1969

An annual, cumulative list, in alphabetic order, of books, journals and other materials available on microfilm, microfiche, and other microforms from publishers in the United States. Over 15,000 titles. 102 pp. Softbound. Postage paid, $4.00.

SUBJECT GUIDE TO MICROFORMS IN PRINT. 1968-69

A biennial, cumulative list, by subject classifications, to books, journals, and other materials available on microfilm, microfiche, and other microforms from publishers in the United States. 110 pp. Softbound. Postage paid, $4.00.
How to find out if your own work is also someone else's.

Some 220,000 doctoral dissertations have been published in this country and Canada during the past 30 years.
This year, an additional 22,000 are expected.
With our centralized store of data on this work, you can prevent your original research from turning out to be unnecessary duplication.
153,000 doctoral dissertations are already on microfilm in our files.
And every year, dissertations from hundreds of universities are added.
Then, key words from the title of each one are programmed into our DATRIX computerized retrieval system. So if you give us the key words that interest you, we can give you a list of all the titles they appear in. (In just a few working days, for example, we can supply you with anything from one title containing “styryltrimethylammonium” to 21,427 with “study”.)
In addition, DATRIX will show you where to find an abstract of each of these dd's in Dissertation Abstracts, which we publish monthly.
And if you want the dissertations themselves, DATRIX also tells you what it will cost for microfilm or xerographic copies.
You can then get the copies from us for as little as $3 apiece.
And have other researchers' work lead you to the information you need to finish yours sooner. Or to avoid starting it.
