Annual salaries increase
The Special Libraries Association's 2001 Salary Survey reports increased earnings for information professionals in Canada and the United States. The average (mean) salary for information professionals as of April 1, 2001, was $58,930 in the United States and $57,904 (Canadian dollars) in Canada.

Information architecture
Library and information science schools are now offering courses and programs in information architecture, which is defined by David Robins, a faculty member at the University of Pittsburgh, as “the design of user experience for Web-based environments.”

Canterbury Tales to join Gutenberg Bible on the Web
Keio University in Tokyo and the British Library, whose Gutenberg Bible site received a million visitors in six months, are producing digital images of the first and second editions of Chaucer’s Canterbury Tales. The quality of the 4000 x 4000 pixel images, which will be accessible on the Internet, is expected to enable “detailed typographical analyses.”

Internet use increases
Using data gathered in the Census Bureau's Current Population Survey, a study by the National Telecommunications and Information Administration and the Economics and Statistics Administration found that “the rate of growth in Internet use in the United States is currently two million new Internet users per month.” There were 143 million Internet users (53.9 percent of the population) in the United States in September 2001, compared to 116.5 million in August 2000 (44.5 percent). Usage by individuals in the “lowest-income households (those earning less than $15,000 per year)” increased at an annual rate of 25 percent, while usage by “individuals in the highest-income households (those earning $75,000 per year or more)” increased at a rate of only 11 percent. Among young adults (18–24 year old) attending school or college, 85 percent use the Internet, “compared to 51.5 percent of those who are not in school.”

80 percent of Internet users submit search requests
Jupiter Media Metrix's ratings report 80 percent of the “estimated 110 million Internet users online in the United States at work or at home made some type of search request” during January 2002.

Science advances by making connections.

**Link**

The connection starts here

**11 Online Libraries:** Fully indexed and searchable:
- Chemical Sciences
- Computer Science
- Economics
- Engineering
- Environmental Sciences
- Geosciences
- Law
- Life Sciences
- Mathematics
- Medicine
- Physics
- Astronomy

**Interdisciplinary Research:** LINK subscribers can access literature in our 11 online libraries, allowing them to search across a vast range of information. Pharmaceutical researchers can find a wealth of data on environmental sciences, lawyers gain in-depth knowledge on areas from chemistry to mathematics to medicine.

**Free Access:** LINK offers tables of contents and detailed abstracts for every publication at no cost. What's more, we supply up-to-date information on research topics and background on the editors of each publication.

**Solving the space challenge:** Our online format enables organizations to continuously expand their collections in the confines of existing space.

The LINK Online First™ service lets users access peer reviewed articles well before print publication, significantly reducing the time it takes for critical discoveries to reach the research community.

Content you can trust.

Westlaw Campus, designed by West Group, the leading provider of legal information since 1876, is the new online legal research tool created specifically for undergraduate and graduate students who need to research law-related issues. Whether the field of study is criminal justice, political science, business, or economics, Westlaw Campus is the essential resource.

Exclusive editorial enhancements make the law easier to comprehend.

Only Westlaw Campus includes editorial enhancements such as synopses and headnotes, all written to clarify your students' understanding of the law.

Simple search options.

Students can search cases, statutes and regulations, by citation, by title or search by issue using Natural Language or Terms and Connectors. Students can research effectively with little or no instruction or assistance.

Unlimited researching.

No matter how many students access the service, no matter for what length of time, there are no budget-busting, per minute, per student fees that can change from month to month. Online fees are fixed and the lowest in the industry. Plus there are no distracting ads because Westlaw Campus is advertising-free – just great legal research, all the time.
