The new ISMEC Information Service in Mechanical Engineering uses the man-machine combination to achieve the highest standards of quality. Consider some of its features.

Biweekly issues of ISMEC Bulletin cover the periodical, conference, book ... literature in mechanical engineering. In each issue, titles are organized within a detailed classification scheme. Cross references are used liberally and where a title does not clearly indicate the subject matter of the reference, it is enhanced by additional words or phrases. Each issue has an Author Index and a Subject Locator which reinforces the classification scheme. Semi-Annual Indexes provide separate sequences for Authors, Bibliographies - Books - Conferences - Reports - Subjects and a List of Journals. The Authors' sequence includes the author's article title(s) and the Subjects' sequence organizes unique phrases for each reference under a fixed thesaurus. Features such as these and many others direct users efficiently and quickly to their precise area of interest. Why not ask for a sample copy and judge for yourself.
Buying full-text copies of journal articles as few as 5 at a time?

Then you'll probably find our Original Article Tear Sheet (OATS®) service is faster, better and less expensive than any other source of full-text copies.

Certainly you've at least heard about OATS. The service that usually provides actual tear sheets of articles, not just photocopies. The multidisciplinary service you can count on for all-but-instant response to just about any request.

Yet perhaps you still hesitate to use OATS because you feel any service that good must be expensive. If so, you've just caught up with another "must be" that isn't. Here's what OATS really costs any time you can order as few as 5 journal articles at once:

<table>

<tr>

<tbody>

Compare our prices to those charged by other full-text sources. You'll find we're more than competitive. Place an order, and you'll find our service is, too. Or, for more information before you order, mail the coupon to OATS specialist Alan Clarke. You'll hear from him.

Yes, Alan Clarke, I like those OATS prices and the idea of one-stop shopping for journal items. So . . .

and

A Suggested Basic Collection
of Children's Books
by
Rosemary Weber

These two bibliographical essays, first published in CHOICE in November and December 1974, are designed as a guide for those librarians who wish to remodel and update their collections of children's literature. They present materials related to all aspects of that literature as currently studied in colleges and universities today. Harriet Quimby and Clara Jackson tell how to go about building a good children's literature collection, while Rosemary Weber suggests a basic list of children's books. Containing over 1,085 titles, this publication includes for the first time an Author and Title Index as well as complete bibliographic information for the titles cited. All titles listed are currently in print unless otherwise indicated.

SECOND EDITION

Encyclopedia of Governmental Advisory Organizations

EDITORS: Linda E. Sullivan and Anthony T. Kruzas

The 1975 edition of the Encyclopedia of Governmental Advisory Organizations covers 2,678 groups functioning in an advisory capacity to the President and to various departments, bureaus, and committees of the government. Each entry lists the personnel, origin, activities, purpose, and affiliation of the advisory group.

This clothbound volume contains updated and enlarged listings from the first edition, as well as fresh listings. Some previous entries have been consolidated; duplications have been eliminated; all have been reviewed and updated as needed. Detailed listings for approximately 200 additional committees are included, many of them for such recent and topical groups as:

- Commission on CIA Activities within the United States
- Citizens' Advisory Committee to Fight Inflation
- Energy Research and Development Advisory Council
- The Commission on Federal Paperwork

The thorough alphabetical and key word index aids convenient and flexible use of EGAO itself and also refers users to the Congressional Record for all congressional committees and their subcommittees. Cross-references are also provided to the United States Government Manual for government departments, offices, and bureaus not considered advisory committees, but whose names suggest they are.

EGAO, like all Gale publications, is available on 30 day approval. Subscribers may also request Standing Order Service in order to save time and paperwork.

To keep the ENCYCLOPEDIA OF GOVERNMENTAL ADVISORY ORGANIZATIONS current, order NEW GOVERNMENTAL ADVISORY ORGANIZATIONS, a periodical supplement which reports on newly established advisory groups during the period between EGAO editions. Inter-edition subscription, with binder, $65.00.
