Retrospective Conversion: A Practical Guide for Libraries, by Jane Beaumont and Joseph P. Cox (198 pages, August 1989), provides information about converting a card catalog to machine-readable form for use with a computerized, automated library system. The book provides essential information for organizing a RECON project, creating or obtaining appropriate machine-readable records, and establishing ongoing procedures for online cataloging. Four appendices provide a comparative chart of RECON services, a directory of firms and organizations providing MARC records and RECON services, sample worksheets, and a selected bibliography. The guide may be ordered for $35.00 from Meckler Corporation, 11 Ferry Lane West, Westport, CT 06880. ISBN 0-911259-25-2.

Sex Discrimination in Higher Education and the Professions: An Annotated Bibliography, by Mary Donovan (32 pages, 1989), consists of 124 annotated citations to monographs and articles that appeared in 1984–1988. Court cases and items from the popular press are excluded. Four major categories are identified (compensation/pension, hiring practices, promotion, and work environment) and library literature is well represented. Copies are available for $10.00 from the National Center for the Study of Collective Bargaining in Higher Education and the Professions, 17 Lexington Ave., P.O. Box 322, New York, NY 10010. ISBN 0-911259-25-2.

Sources in Electrical History: Archives and Manuscript Collections in U.S. Repositories, compiled by Joyce E. Bedi, Ronald R. Kline, and Craig Semsel (234 pages, 1989), lists 1,008 collections in 158 repositories, primarily university archives and state historical societies. This volume is the first in a series that promotes research in electrical history by making scholars aware of the diverse collections of primary sources and by encouraging the collection and preservation of these materials by archives and manuscript repositories. Subject and repository indexes are provided. The book is available for $15.00 (prepaid) from the Center for the History of Electrical Engineering, IEEE, 354 E. 47th St., New York, NY 10017.

Telecommunications for Information Specialists, by Larry L. Learn (165 pages, June 1989), covers such topics as regulation, networks and network technology, the telecommunications infrastructure, recent developments in public networks, and future network strategies. The book has a substantial glossary of telecommunications terms and acronyms as well as a comprehensive bibliography and index. A study guide assists readers to further their understanding of the material presented. If you always wondered what was involved in multiplexing, inside wire deregulation, or short-haul transmission devices, this is the book for you. The cost is $15.00 (specify product code 8080). Non-members of OCLC must prepay and send orders to OCLC, Dept. 630, Box ONB, Columbus, OH 43265. ISBN 1-55653-075-7.
