5th Edition Published in 3 Volumes

The 5th Edition of AIAAD is over 25% larger than the previous edition. While the emphasis is on American material, AIAAD includes terms from Britain, France, Germany, Russia, and other countries. Its 130,000 entries span the centuries, from the ancient Roman “SPQR” to acronyms growing out of current concerns over fuel, the economy, and ecology.

NAIA provides current coverage of all the fields in Volume 1, with special emphasis on keeping subscribers up-to-date in rapidly changing fields, such as technology, politics, world affairs, medicine, social welfare, and education. The 1976 supplement is expected to contain over 10,000 new terms, and the 1977 supplement will add several thousand additional terms and will cumulate all the terms in the first supplement.

Based on Volume 1, this “backwards” dictionary contains 130,000 entries arranged alphabetically by complete words or terms, with the acronyms as definitions. With the aid of NAIA, researchers are able to know the short forms of the names of organizations, technical terms, etc.
