Journalists choose Internet for research

A recent survey of 232 journalists by the public relations firm Burson-Marsteller found that 37% choose the Internet as their “first source of information”; 27% choose a library or archives. Fifty-seven percent trust the Internet the “same as traditional media”; 3% trust the Internet “more than traditional media.”

Information foraging

Research conducted by Peter Pirolli and Stuart Card at Xerox’s Palo Alto Research Center suggests that foraging theories can be applied to information gathering. Web surfers “rely on prehistoric instincts to maximize their yield when they hunt and gather morsels of information.”

Usage of Web proxy servers

Eighty-four percent of 74 libraries responding to a survey last month use proxy Web servers to enable remote access to vendor-provided resources. Web proxies are also used for providing access to IP-restricted campus resources; filtering Internet access; denying access to Web-based e-mail, gaming, and chat sites; conserving bandwidth; and creating statistical reports.

OCLC stats

The 37,297 OCLC participating libraries cataloged 55.2 million items on the online system between July 1999 and June 2000 and completed 8.6 million interlibrary loan transactions.

More reference librarians

Market Data Retrieval reports a 56 percent increase in the number of reference specialists employed by public libraries from 2,634 in 1995 to 4,100 in 2000.

UNESCO Archives Portal

The UNESCO Archives Portal launched in September 2000 now links to 2,560 Web sites in the following categories: Architectural (48), Audiovisual (84), Business and Labor (65), Diplomatic (14), Family (4), International Organizations (19), Literature and Art (102), Military (23), Municipal (670), Museums (59), National (71), Parliaments and Political Parties (47), Religious Communities (120), State and Regional (265), Universities and Research Institutions (383), and Other (26).

One gateway to the latest research published in leading Elsevier Science physics and astronomy journals

**PhysicsDirect Key Features:**

- **One convenient access point** to 53 core Physics & Astronomy journals from Elsevier Science
- **Coverage of the complete spectrum** of Physics & Astronomy research
- **Cross reference links** with the two major physics societies, the American Institute of Physics (AIP) and The American Physical Society (APS).
- **INSPEC® and Ei Compendex®** databases as add-on options
- **Single interface integration:** access to over 140,000 full text articles, a powerful bibilographic search layer and a personal alerting service
- **Full archive** from 1995 to the present.

**Free institutional trial**

Any library that has a current print subscription to one or more physics & astronomy journals published by Elsevier Science can register for a 3 month free institutional trial to PhysicsDirect.

**How to register for the FREE Trial?**

Please contact your nearest Elsevier Science Regional Sales Office (see also website) to obtain a confirmation number, needed for registration:

**North America, Central & South America:**
- Tel: 1 888 615 4500 (+1 212 462 1978, outside the USA and Canada)
- Fax: 1 212 633 3680
- Email: physicsdirect@elsevier.com

**Japan:**
- Tel: +81 3 5561 5035
- Fax: +81 3 5561 5047
- Email: jphinfo@sciencedirect.com

**Asia Pacific including Australia (except Japan):**
- Tel: +65 434 3727 • Fax: +65 337 2230
- Email: sginfo@sciencedirect.com

**Europe, the Middle East, & Africa:**
- Tel: +31 20 485 3767
- Fax: +31 20 485 3432
- Email: physicsdirect@elsevier.nl

Are you managing your collection?
Or is it managing you?

No longer does managing your collection have to involve countless hours of shelving, tracking and weeding drudgery. With 3M Digital ID Collection Management, these and other labor-intensive tasks can be completed in just a fraction of the time. So your staff will spend less time chained to your collection. And more time serving your customers. For more information call 1-800-944-3512 or visit our Web site: www.3M.com/library
