Speed of the Slammer Worm

According to a technical report issued by the Cooperative Association for Internet Data Analysis (CAIDA), the Sapphire/Slammer computer worm, which "infected at least 75,000 hosts" on January 25, "was the fastest computer worm in history. As it began spreading throughout the Internet, it doubled in size every 8.5 seconds. It infected more than 90 percent of vulnerable hosts within 10 minutes."

SLA salary survey

The Special Libraries Association's 2002 Salary Survey reports increased earnings for information professionals in both Canada and the United States. The average (mean) salary for information professionals as of April 1, 2002, was $60,583 in the United States and $59,328 (Canadian dollars) in Canada.

Reliance on Internet information

Two recent reports address the perceived importance and reliability of Internet information. A Pew Internet Project study finds that "69 percent of Americans expect to be able to find reliable, up-to-date news online," and 67 percent "expect to find reliable health care information online."

The third annual UCLA Internet Report finds that "60.5 percent of all users considered the Internet to be a very important or extremely important source of information," however, "the number of users who believe that information on the Internet is reliable and accurate" has declined from 55 percent in 2000 and 58 percent in 2001 to 52.8 percent in 2002.

Issues of privacy in public libraries

Less than ten percent of librarians responding to a recent survey of U.S. Public Libraries by the Library Research Center at the University of Illinois "say they have changed patron Internet use policies" in response to the USA Patriot Act of October 2001. "Almost 70 percent (69.1) ... have instructed staff or library boards about library policies regarding patron privacy."

Book trade in the United Kingdom

The total number of titles published in the United Kingdom increased from 102,102 in 1996 to 119,001 in 2001. The average book price increased less than one percent from 2000 (£7.43) to 2001 (£7.48).

New EMBASE.com V3.0 Features

Quick Search
1. Search screens designed for optimal record retrieval
2. Option to search only records added within a selected number of days
3. Wider range of limit options, e.g., human, gender, 10 age groups, animal and human study types
4. Option to search deduplicated EMBASE + MEDLINE or EMBASE records only

Advanced Search
1. Search for records within an exact date range
2. New pull-down field indexes and searchable lookups to pinpoint specific authors, device or drug names and manufacturers

Expanded Full Text Access
1. DOI (Digital Object Identifier) linking to more than 100 leading publishers' websites through CrossRef
2. All articles can be ordered via Infotrieve, the leading document ordering and delivery service

Plain Text Downloads
Download records in a generic format readable on all computer platforms

Scirus
EMBASE.com's integration with this award-winning scientific search engine enables users to run their queries across the Internet
