Stanford creating digital Dewey for Internet

Stanford University's integrated digital library project is attempting to invent the electronic equivalent of the Dewey decimal system for the Internet. Imagine trying to find information in a library where the books are organized differently on every shelf. It's much like that for people searching for information on the Internet. Stanford's project seeks to provide a simple and consistent interface that enables people to find the information they seek on the Internet, regardless of where it is stored or how it is organized.

The Stanford project is one of six digital library projects begun last September as a result of a joint $24.4 million initiative by the National Science Foundation, the Department of Defense Advanced Research Projects Agency, and the National Aeronautics and Space Administration. Stanford's four-year effort is designed to create a "virtual library" by providing Internet users with a seamless interface to the wide variety of information sources and collections available on the Net. Hector Garcia-Molina, project director and professor of computer science and engineering, said, "We intend to develop a common environment that links everything from personal information to library collections to large research databases."

The basis of this environment will be an "information bus" consisting of basic concepts, language, and protocols that can tie together the materials, services, and users of information. In addition to the technical problems it will address, the project will tackle concerns about the cost of information and such critical issues as protection of intellectual property rights, privacy, and security of personal information.

Commission and CLR vote to affiliate

The Boards of Directors of the Commission on Preservation and Access and the Council on Library Resources (CLR) voted on February 24 to affiliate with one another, with the first step being a joint presidency. Deanna B. Marcum has agreed to serve as president of both organizations and has pledged to enhance their efficiency and effectiveness. The affiliation was effective March 1.

Billy Frye, chairman of the Commission, and Martin M. Cummings, chairman of the Council, said, "We see the joint appointment as a major step in strengthening the programs of CLR and the Commission as they support and advocate the essential role of libraries in a time of changing opportunities and needs."

A main objective of the affiliation is to achieve staffing and programmatic efficiency. Other affiliation principles are that each organization remains distinctive and complementary, the independence of each board will be preserved, each organization will retain fiscal independence, and cooperative projects will be undertaken if deemed advisable by both boards.

More on information literacy data

The January and February "News from the Field" columns reported on ACRL joining the Association of Higher Education in a cooperative research project to collect data on existing information literacy programs in higher education institutions across the U.S.

Survey forms were sent to college and university campuses requesting information and more than 200 responses were received.

In the second phase of this study 26 institutions with exemplary information literacy programs were selected to participate in the first regional workshops to be held in the middle states region. The first workshop was held at the Philadelphia College of Pharmacy and Science on March 27; the second will be held on May 1 at Monroe Community College in Rochester, New York. Plans call for workshops to be held in the western region.

The 26 participating institutions are being asked to send teams of three to the workshops. The team members can include librarians, faculty, computer center staff, and/or administrators. Invitations for the March and May workshops went out to campus contacts for the Middle States Association regional accrediting agency.
Memorial resolution honoring William Andrew Moffett (1933–1995)

The profession was saddened to learn in February of the untimely death of William A. Moffett, director of the Huntington Library. The ACRL Board of Directors passed this resolution, which was read by Beverly P. Lynch at a memorial service for Moffett on February 28, 1995. See page 286 for a summary of Moffett’s career.

WHEREAS William Andrew Moffett had a distinguished career in academic librarianship contributing to the development, preservation, and dissemination of information worldwide; and
WHEREAS he was always at the forefront of academic and research librarians in movements whose aims were to pursue and increase the power of library users, the most notable being providing free and open access to the photos of the Dead Sea Scrolls contained in the collections of Huntington Library; and
WHEREAS he was a widely acknowledged expert on college libraries, special collections, and library security; and
WHEREAS he served the Association of College and Research Libraries as president in 1989–90 and as chair of the College Libraries Section in 1984–85; and
WHEREAS he was awarded the highest honor the academic library profession gives, the Academic or Research Librarian of the Year Award in 1993; and
WHEREAS he was a dedicated friend, mentor, colleague, and supporter to all who loved books and ideas; and
WHEREAS there can be no doubt that his contribution to humanity and to the library profession has been extraordinary;

THEREFORE BE IT RESOLVED that members of the Association of College and Research Libraries:

Celebrate his many accomplishments and his tireless service to the library profession;

Reaffirm within ourselves the principles for which he stood and for which he worked;

Remember with joy his love of life and living;

Honor his memory and his continuing influence, and, be it

FURTHER RESOLVED that the Association of College & Research Libraries expresses its deepest sympathies to his wife Deborah, his children Pamela, Stephanie, William Andrew, and Charles, and his grandchildren.

Duke focuses on international library programs

A new Center for International Library Programs at Duke University was inaugurated in February. The purpose of the new center is to “focus and integrate the provision of resources to our academic community,” according to Peter Lange, vice provost for academic and international affairs at Duke. “The libraries of the university have successfully developed resources to support academic work and teaching in international and area studies, but the time has come to coordinate our efforts across campus.”

The international and area studies team at Perkins Library is joining with its campus counterparts—the Fuqua School of Business Library, the Law Library, the Medical Center Library, and the Divinity Library—to establish the Center for International Library Programs.

Initial plans for the center include closer coordination of acquisitions, a realistic assessment of the international resource needs of faculty and students, an evaluation of the impact of electronic resources on research patterns and library budgets, and the development of workshops on the use of new technologies in international research. The center plans to establish an internship for young librarians with an interest in pursuing careers as foreign-area bibliographers.

Ameritech Library Services names new president

Ameritech Library Services President Paul Sybrowsky announced in late February that he will become chairman of the company to give him more time to pursue a new business venture, and that Thomas Quarton will succeed him as president.

Quarton, formerly a vice-president with Ameritech Enhanced Business Services, will assume day-to-day operations and will be working in tandem with Keith Wilson, executive vice-president of the company. Quarton comes to Ameritech Library Services with more than 20 years of experience in the library services industry, most recently serving as executive vice-president of the company. Quarton replaces Sybrowsky, who will remain as chairman of the company, focusing on long-term strategy and growth.
years of experience in business development and consulting, with an emphasis on building market-driven and customer-focused companies.

Sybrowsky was a cofounder of Dynix, Inc., in 1983 and served as both general manager and president of Ameritech Library Services after Dynix and NOTIS Systems were purchased by Ameritech Corporation. He has been recruited to become president of Vicendus, a new Provo-based enterprise which will apply distance learning technology to adult education conferences and seminars.

Elsevier's electronic subscriptions next step after TULIP
Elsevier Science is introducing Elsevier Electronic Subscriptions (EES), an electronic version of its traditional research journals. This new service, to be available initially on a pilot basis, will offer libraries complete electronic editions either in addition to or in lieu of paper journals. EES is available for all of the more than 1,100 Elsevier Science journals, published under the imprints of Elsevier, Pergamon, North-Holland, and Butterworth-Heinemann.

The electronic subscriptions will be provided in cover-to-cover bitmapped page images (black/white single page TIFF files, resolution 300 dots per inch, compressed using CCITT Fax Group IV). Bibliographic header information, including the abstract and keywords (when present), will be provided in structured SGML-tagged text. The full text will be provided as an unedited and unstructured ASCII file—similar to the format used in TULIP, an experiment in full-text electronic subscriptions undertaken by Elsevier Science and nine universities beginning in 1991.

EES files are intended to be implemented with either the library's own software or third-party software, making use of open standards available now. Elsevier Science will be inviting institutions to participate in the pilot phase, expected to last through 1995.

Smithsonian Libraries available on Internet
The Smithsonian Institution Libraries' online catalog can now be accessed via the Smithsonian Research Information System (SIRIS) on the Internet. The Smithsonian Libraries' catalog carries records of its 18 branch libraries. To access SIRIS and the libraries' catalog, use telnet to connect to siris.si.edu. To exit SIRIS, type STOP.

Chinook blows into CU-Boulder libraries
The University of Colorado at Boulder dedicated a cluster of terminals to signal the official start of the University Libraries' catalog, Chinook, on January 10. The dedication included a ceremony suggested by a Native-American staff member to "secure clearance and possibly a blessing for the use of the name," according to Deborah Fink, the public information officer for Norlin Library. Chinook is an Indian name that refers to warm winter winds that gust along the eastern slope of the Rocky Mountains, dramatically raising temperatures and evaporating snow. The Chinook catalog is one component in the CU-Boulder Libraries' new Innovative Interfaces system, which also includes cataloging, circulation, serials control, and acquisitions models.

VCU game benefits Black History Archives project
The Virginia Commonwealth University (VCU) Athletic Department contributed $6,000 of the proceeds from the VCU vs. Virginia Union Uni-
University (VUU) basketball game to the VCU Libraries' Black History Archives Project. The project is a cooperative effort by VCU, VUU, and the Black History Museum and Cultural Center of Virginia, Inc., to find, preserve, and make available for public use the historical records of African Americans within the Commonwealth of Virginia. The project, a major component of a program funded since 1990 by the Ford Foundation, IBM, and VCU, uses advanced technology to digitize and store information in a database. The database now includes records of the Southern Christian Leadership Conference, the Richmond Crusade for Voters, the Fourth Baptist Church, Gillfield Baptist Church, and the Astoria Beneficial Club.

STS seeks new logo
The Science and Technology Section (STS) of ACRL is sponsoring a contest for the design of a new logo in ASCII. An entry may be a design of the acronym (STS) or it may be a graphic design that represents disciplines addressed by the section—science and engineering/technology—or a combination of the acronym and the disciplines. The ASCII format is dictated by the proliferation of electronic communication. The logo will be used on newsletters and other STS publications—electronic and print. Entries will be accepted until May 15, 1995. Please submit your designs to Edward Gonzalez at e-mail: icefg@asuvvm.inre.asu.edu; fax: (602) 543-8540; or mail: Arizona State University West, Fletcher Library, 4701 W. Thunderbird Rd., P.O. Box 37100, Phoenix, AZ 85069-7100. For details contact Gonzalez or Carol Robinson at e-mail: csrobins@mit.edu at the Barker Engineering Library 10-500, Massachusetts Institute of Technology, 77 Massachusetts Ave., Cambridge, MA 02139.

ACRL listserv corrections
The February issue of C&RL News listed the wrong addresses for the Extended Campus Libraries Services Section (ECLSS) listserv, Offcamp, and the Discussion Group on Electronic Text Centers, ETEXTCTR.

To subscribe to Offcamp send the message “subscribe offcamp first name last name” to listserv@cms.cc.wayne.edu or to listserv@wayne.stl.bitnet.

To subscribe to ETEXTCTR send the message “Subscribe ETEXTCTR your name” to LISTPROC@lists.princeton.edu. The editors regret the errors.
Now get unlimited, low-cost access to the PAIS Database via leased tape

For as low as $3,000 per year, you can have unlimited access to the PAIS International Database, the premier bibliographic index to public and social policy issues.

Economical, fixed-fee pricing. With leased magnetic tapes, there’s no need to worry about usage and teleconnect fees. Your users can search PAIS as often as they like, for as long as they like, all for one annual rate.

Flexibility and ease of use. PAIS is compatible with most OPACs. That means your users don’t have to learn different search software, and you don’t have to acquire new hardware.

Institution-wide availability. With PAIS International on your network, users in dorm rooms and offices across an entire campus or organization can access the database 24 hours a day.

A total information resource. The PAIS magnetic tape includes references to some 400,000 journal articles, government documents, statistical directories, monographs, conference reports and more. The database also references literature published worldwide in English, French, German, Italian, Spanish and Portuguese. Bibliographic records, a Thesaurus File, and Periodical and Publisher Directories round out this unique resource. ISSN, ISBN, LC and Superintendent of Documents are included in the data.

Full telephone support. PAIS support is never more than a fast phone call away.

An annual subscription to PAIS on magnetic tape includes 12 monthly updates and complete documentation. Backfiles also are available from 1972 to the present, either as a whole file or in five-year units. For more information or a free sample tape, use the coupon below or call toll-free, 800-288-PAIS.

☐ Please send me more information on PAIS Database tapes.

☐ Please call me about receiving a sample tape and tape documentation.

PAIS

No one looks at the world like PAIS
