Cornell University has received $275,000 in grants to help preserve digital documents. The Council on Library and Information Resources gave $75,000 to support the development of "risk management" tools to help librarians decide how best to manage their digital data; the Federal Institute of Museum and Library Services gave Cornell a $200,000 grant to design and implement a plan for long-term preservation of the documents the library already has in digital form, which include nearly 3 million pages of scanned archival documents.

The University of Illinois at Urbana-Champaign's Graduate School of Library and Information Science has received a $65,000 grant from the Lila Wallace-Reader's Digest Fund. The school's Library Research Center (LRC) is creating a national survey of literacy services in public libraries; survey results will shape the fund's financial commitments to libraries that address adult literacy problems. Returned surveys will be coded by LRC staff, data will be analyzed, and a narrative report summarizing the survey findings will be prepared and delivered to the Lila Wallace-Reader's Digest Fund in September 1999.

The Council on Library and Information Resources (CLIR) was awarded core funding of $1.2 million to establish the Billy E. Frye Digital Leadership Institute in collaboration with Emory University. The institute was formed to effect fundamental change in how universities manage their information resources in the digital era. The first institute will take place in the summer of 2000 and will provide continuing education opportunities for persons who are responsible for transforming the management of scholarly information in academic institutions. CLIR will work closely with EDUCAUSE, the Association of Research Libraries, and others to develop the curriculum.

The Institute of Museum and Library Services (IMLS) gave grants totaling $135,366,938 to library agencies in the 50 states, the District of Columbia, and the U.S. territories. This marks the second time these annual awards have been made through the Library Services and Technology Act. IMLS provides funds to the state library agencies for subgrants to libraries of all types and for statewide initiatives and services. The two funding priorities of LSTA are to improve electronic sharing of information and to expand public access to library information and resources. The State Allocation Table is available at the IMLS Web site at http://www.imls.fed.us.

Northeastern University has received a $153,155 award from the National Historical Publications Records Commission (NHRP), a division of the National Archives and Records Administration. The award will support Preserving the History of Boston's Under-Documented Communities—a two-year project to identify, locate, secure, and make accessible the most important and at-risk historical records of four underdocumented communities in Boston: African American, Chinese, gay and lesbian, and Puerto Rican.

Lehigh University (LU) has received a bequest of more than $800,000 to establish the James and Grace Schnabel Memorial Endowment for the acquisition of library materials. Information Resources, the combined library and computing unit at LU, expects to use the income generated from the endowment to support some of the electronic materials that are an increasingly important part of the library resources available to students, faculty, and staff. James Schnabel was in the Lehigh class of 1931. His widow Grace Swift Schnabel remained in close touch with LU until her death in 1998.

Acquisitions

Actress, comedienne, and singer Carol Burnett has given UCLA an extensive collection of...
materials from "The Carol Burnett Show." This popular primetime television program, which aired on CBS in 284 episodes from 1967-78, earned 25 Emmy Awards and is now recognized as one of the classics of American television. The three-part gift includes music, videotapes and scripts, which together form a complete archive of the program and its individual elements.

Physiologist Carl W. Gottschalk's rare book collection on the anatomy and physiology of the kidney has been donated to the University of North Carolina at Chapel Hill (UNC-CH). Gottschalk, a world-renowned renal physiologist and UNC-CH professor of medicine for almost 40 years, devoted nearly his entire academic career to nephrology and built an extensive and unparalleled library of rare books and manuscripts about the kidney. After his death in 1997, his family gave the entire collection, appraised at $500,000 to UNC-CH. The collection consists of more than 3,000 items on the subject of the kidney, including his professional papers and extremely rare first editions. The earliest volumes date from the 16th century and continue to the present.

A rare 1896 edition of Chaucer has been acquired by Washington University in St. Louis. The volume was created and published by Arts & Crafts designer William Morris. Published in a small edition of only 425 copies, the Kelmscott Chaucer features 87 original woodcuts by the English painter Sir Edward Burne-Jones. Everything else—from the cover and binding to the page layouts, intricate ornamentation, and even the typeface (appropriately enough called, "Chaucer")—was designed by Morris himself. The volume was acquired in large part through the generosity of Washington University alumnus Marion Cronheim, class of 1951.

The David S. Hubbell Mark Twain Collection has been acquired by the University of South Florida (USF) in St. Petersburg. The collection consists of notable editions of Twain's writings, including rare first editions, original periodicals containing Twain's articles, and significant modern editions. Also included are first editions of authors who were friends of associates of Twain and secondary works of Twain biography and criticism. Hubbell is a physician and professor at the USF Medical School, and he assembled the collection over a period of 30 years.

Brown University has received the Leab Collection, a collection of George Orwell materials. Consisting primarily of printed works by and about Orwell, the collection contains first and subsequent editions of all of Orwell's books, from Down and Out in Paris and London, his first published book, to 1984, his last. The collection is rounded out by a small, select group of manuscript material and books owned by Orwell, including school books signed "Eric Blair," Orwell's birth name, with a considerable body of ephemeral material.

Novelist Jane Urquhart's diary has been donated to the University of Waterloo (UW). Covering the period from 1974-79—a time that Urquhart describes as preceding her writing career—the 258-page diary also served as a sketchbook, journal, and trip diary. She is the 1997 winner of the Governor General's Award for her novel The Underpainter. Urquhart describes this diary as her best one in that it shows her collaborative work with her husband, artist Tony Urquhart. The complementary nature of her diary with her husband's series of idea books prompted Urquhart to feel that this particular volume was well-suited to be added to the existing research collections in the library. It was important for her to have a portion of her original materials in the UW Library because, she said, "Without the UW Library I couldn't have written the books I have. . . . I really feel at home there."

Faxon’s
E-Journal
Express!

Destination: The Faxon Company

Faxon is your ticket to expert electronic journal services ranging from comprehensive e-journal databases to a powerful web-based information searching and retrieval tool called Dawson Information Quest (IQ). Our latest e-journal resources and services include:

■ The License Depot™ A comprehensive electronic journal database management service which includes easy access to bibliographic information and licensing resources as well as prices and terms of online access.

■ Subscription Depot A powerful web-based tool for managing your serials subscriptions right from your desktop. The Subscription Depot provides up-to-date access to all your transactions, including orders and claims. You’ll also be able to search our global catalog of over 250,000 serials titles.

■ Serials Update Service Stay current on serials titles! This new service provides daily updates of bibliographic and/or order changes to serials titles with entries under both the old and new titles. See for yourself under Information on Titles on Faxon’s website.

■ The Faxon Institute Industry Resources Webpage Features hundreds of links to published research articles, publisher websites, library collections, and professional library associations and organizations. Check it out under Industry Resources on Faxon’s website.

Faxon is part of the Dawson Group of Companies which also includes: Dawson Information Quest, EOS International, Quality Books Inc., and Turner Subscriptions—all companies involved in bookselling, subscriptions, web-based electronic information delivery, and library information management software and services.

For more information, contact your Faxon sales representative at 1-800-766-0039. Or visit us online at www.faxon.com.
Science at the Speed of the 21st Century

ScienceDirect—the new web-based publishing platform that delivers desktop access to the full text of more than 1,100 scientific, technical, medical, and social sciences journals published by Elsevier Science and other participating publishers. This rich collection of journal articles is enhanced with an index and abstracts database that contains the abstracts from the core journals in the major scientific disciplines and provides a starting point for the research process.

Subscribe to ScienceDirect and extend your library’s print journal collection to the desktop of every user in your community. ScienceDirect, the most comprehensive scientific database available today. Because you’re serious about research.

In a world obsessed with megahertz and megabytes, we haven’t lost sight of the most important goal...

Megacontent!

Ulrich’s International Periodicals Directory 1999

It may seem quaint to be discussing content over bandwidth or baud rates, but the next time you have to verify 10 ISSN for an ILL request . . . check on copyright compliance for a downloaded article you wish to distribute . . . or determine which document delivery services cover a recently cancelled journal, your operating system won’t be much help. For these and the myriad other questions you’re confronted with, there’s just one answer.

Available in print, on CD-ROM, and online, the Ulrich’s database represents the information foundation you need to frame a viable serials agenda in the new digital environment.

**THE FACTS HAVE CHANGED!**

Is there a hole in your periodicals collection where public opinion ought to be?

Fill it with the Public Perspective

“The best single source for keeping abreast of the current state of public opinion.”

Morris Fiorina
Professor of Political Science
Stanford University
