HORIZONS OF CRITICISM

An Assessment of Religious-Literary Options
Vernon Ruland

This brilliant work systematically evaluates the important critical works on religion and literature with a view to their contribution toward defining these studies as parts of an interdisciplinary field. The approach is to classify contemporary writing in both these areas according to their perception of a total religious-literary experience.

By using a typology of four concentric areas, Vernon Ruland is able to offer a comprehensive religious-literary definition of his own. This theory has two uses. First, it offers a means for the reshaping of one's personal intellectual categories so as better to encompass human realities, and, second, it discovers an underlying unity in the separate quests of today's theologians, philosophers, and literary critics.

The work is also a handbook for the study of literature and religion. By serving as a guide to its essential literature, joining issues and relating themes, it suggests the contents of an educational program and sets the directions for further study.

"...may well turn out to be the basic handbook of religious-literary studies for years to come."
Christianity and Literature

"...should be invaluable to graduate students in literature and theology, or, most of all, the interdisciplinary field that relates the two."
Choice, September 1976

"...meets a long-standing need for a convenient handbook capable of introducing the advanced student in both areas to the interdisciplinary sphere of religious-literary studies."

From Literacy and the Nation’s Libraries

Reading and the Adult New Reader
Helen Huguenor Lyman

A reliable guide for librarians, teachers, editors, library science professors, and students who are involved in the evaluation, uses, and creation of materials for adult new readers. The focus is on the readability of materials in collections for such readers; it organizes the theories of readability for practical application as well as describing the reading interests of minority group members.

Lyman’s method of identifying works suitable for adult new readers extends the relevance of this book to the entire field of adult education.

Major topics that are discussed include reading services; trends in society; beliefs, attitudes and values affecting readers and reader groups; reading collections for the adult reader; evaluation of reading materials; and implications of these topics and factors for library service. This work points out a direction for bringing the adult reader and library resources together.

Library Materials in Service to the Adult New Reader
Helen Huguenor Lyman

Published here as a comprehensive report, from the background of the research through to the principal recommendations, this volume not only establishes criteria for evaluating reading materials, but also provides a multitude of information about the new literate and their use of the media. This study will guide librarians, community workers, teachers, publishers, and editors in both creating and selecting literature for these newcomers to the reading public.

Information for the Community
Joseph C. Donahue and Manfred Kochen, editors

This book is the first comprehensive treatment of community information and referral (I & R) centers—those agencies that act as contact points between people with problems and the services that are needed to help with these problems. It analyzes the needs that gave rise to the many organizations now providing I & R services, and describes some approaches that have succeeded and some that have failed.

Information for Everyday Survival: What You Need and Where to Get It
Priscilla Gotstick of the Appalachian Adult Education Center

Presents an annotated list of free and inexpensive materials arranged under such basic categories as aging, children, free time, and housing. Some sample subheadings are abortion, getting a job, personal finance, and remodeling a home. Titles, descriptions, and sources of each item are arranged in a tabular format to facilitate identification. The titles were selected for readability, and the reliance on booklets keeps purchasing costs low.
