Public Internet access
While more than 99 percent of public libraries offer Internet access, many have not kept up with increasing infrastructure demands, a trend that may have implications for demand at academic libraries. Public library branches have an average of 10.7 public access workstations. Bandwidth speed has decreased slightly, with 62.1 percent of public library branches having connection speeds of greater than 769 kbps in 2007, compared to 63.3 percent in 2006. The average number of workstations has remained steady, while demand has increased. Nearly 80 percent of libraries reported that they have insufficient workstations some or all of the day.

Academic workplace satisfaction
The Collaborative on Academic Careers in Higher Education at the Harvard Graduate School of Education reported results of a survey of general job satisfaction among faculty nationwide. Overall, faculty members at colleges were more satisfied than those at universities (4.06 versus 3.60 on a 5-point scale). Faculty members at public universities were less satisfied than their peers at private institutions (3.60 versus 3.79). Two universities (Brown and Stanford) achieved exemplary status in eight out of twelve categories surveyed.

Most literate cities
Among the 69 largest U.S. cities, Minneapolis is the most literate, according to an annual study that focuses on six key indicators of literacy: newspaper circulation, number of bookstores, library resources, periodical publishing resources, educational attainment, and Internet resources. Seattle, St. Paul, Denver, and Washington, D.C., round out the top five. Aurora, Colorado; Anaheim, California; El Paso, Texas; and Stockton, California, were ranked the lowest on the list of 69 cities.

WikipediaVision
WikipediaVision is a Web site that displays anonymous near real-time editing of Wikipedia, with an overlay to Google maps. Each Wikipedia edit displayed includes the title of the article, a summary of the edit, a link to the changes made to the article, geographic location of the Wikipedia user, and the time the edit happened.
